

# **REF 7161**

## **ASSEMBLY INSTRUCTIONS FOR THE CRD STAINLESS STEEL COLLECTOR REF: 7161**

- Remove the original silencer
- Remove the original collector
- Fit the CRD collector by using the original seal, without tightening the cylinder head flange
- Fit the silencer back on using the original seal and put all the screws in place although do not tighten them
- Firmly tighten all the screws using a threadlocking compound
- Lastly, tighten the connecting clamp
- Take the original collector cover along with the clips and screws, and fasten it onto the CRD collector

### **Tips:**

The brown colouring is a chemical consequence of the heating of stainless steel.

- Maintenance: None
- Cleaning: By polishing using fabric discs and a polishing compound

---

All the parts have been inspected before dispatch. We guarantee only parts that may prove defective before installation. As we do not control the mounting of our products, we cannot be held responsible for personal injuries or technical damage resulting from a wrong assembly carried out by yourself or a third party.
